For 2025

For three years now, I have had the honor and privilege to serve as a Board Trustee. When I put in my application for Board Trustee consideration, safety was my main concern and motivation. They continue to be motivation for my participation in various committees in ACA. Because of what I have learned in working my program, I know that safety and discomfort are two different things. I find it very important to listen and ask questions for clarification and then resolve the issue. Being present with where we are as an organization, and listening to all of the ideas of how we might move forward is inspiring. I am looking forward to participating in this shift into our future. As part of that, it has been important, and many times very inspiring, to look at all of the contributions and thoughts of fellow travelers and leaders from our past. Serving on and participating in the committee's I am part of, I have had the opportunity to meet and be inspired by so many wonderful people. I see their commitment to their program in their tireless resolve to make this program even better.

So, my goals are to continue listening carefully, consider, to the best of my ability, every decision needing to be made, and then, with my HP guidance, vote my conscience to ensure that our program continues to grow and be available to the adult children of the future.
